

Sustainability Policy

KBZ works strenuously to ensure sustainable growth across the Group. Working in multiple sectors, this means each of our companies face unique challenges and opportunities. Each has a different range of stakeholders and its own individual goals and objectives.

As a Group we are united in our support of all the core tenets of the UN Global Compact Codes of Practice. KBZ Group is reassessed each May annually. The Group is currently recognised as an active participant and is striving to attain advanced status.

Our broad range of policies and overarching Code of Conduct outline KBZ Group's commitments to responsible and sustainable business practices. These apply to all our companies, suppliers, contractors and any other stakeholders with an impact on or that is affected by our business activities.

Between 2016 and 2018 we have been in regular collaboration with the Myanmar Government, the Myanmar Centre for Responsible Business, Global Witness, the Global Reporting Initiative (GRI), the Extractive Industries Transparency Initiative (EITI), the UN, INGOs and local NGOs. We firmly believe the sustainability of our Group and subsidiary companies depends on sincere engagement with all individuals, communities and organisations with any vested interest in the KBZ Group of companies.

KBZ has a cascading training and refresher approach across the Group to ensure all new staff and current staff are fully aware of and committed to our policies which are the backbone of our sustainable success.
